Clones are derived from the bovine BAC library CHORI-240
(http://www.chori.org/bacpac/bovine240 htm). For BAC library
availability, please contact Pieter de Jong (pdejong@mail.cho.org).
Clones may be purchased from BACPAC Resources
(http://www.chori.org/bacpac/ordering information.htm). This work
was undertaken as part of the International BAC Mapping
Consortium (IBBMC) by by University of Illinois at Urbana
Champaign, USA with funds provided by grant No. AG202-34480-11828
from USDA-CSREES and A099-32205-8534 from USDA/NRI (Livestock

/note="Organ: embryo; Vector: pBluescript SK-; Site_l:
BCORI; Site_2: Xhol; Library was prepared from 50 ug of
total RNA by oligo-dT priming and ANV reverse
transcriptses. After addition of EcoRI linkers and
ECORI-Xhol digestion, the CDNA was size selected by
chromatography on Sepharose CL-4B columns and fractions
containing cDNAs larger than SOO by were ligated into
ECORI-Xhol-digested lambda ZAPII (UniZAP-XR) and packaged
in vitro. Average insert size is 1.4 kb. The original
library contained 6 x 106 recombinants, of which 3 x 106
were amplified and stored at -7.0 C in SM buffer containing
7% DMSO. 3 x 106 pfu were mass excised and the resulting
phagemids used to infect Top10F. References: Science 253,
196-196 and Methods in Molecular Blology 97, 555-574.
Additional sequences from this library have been deposited
under the name Xenopus laevis dorsal blastopore lip.

- Determination of this BAC-end sequence was carried out as part of collaboration with the Barkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial ECORI digestion of Drosophila DNA provided by the BDGP from the 1sogenic strain y2; cn bw sp, the same strain used for the BDGP's Pl and BST libraries. A more detailed description of the library and how to order individual BAC clones, the entire library, or filters for hybridization from the BACPAC Resource Center can be found at http://bacpac.med.buffalo.edu/drosophila_bac.htm.
